AI USAGE VISIBILITY AND CONTROL

Your people already use AI. Now you can see it, and steer it.

See which AI tools your people use and what goes into them, then steer them to the ones you approve.

1 in 5
breached organizations had a shadow AI breach[1]

+$670K
breach cost where shadow AI use was high[1]

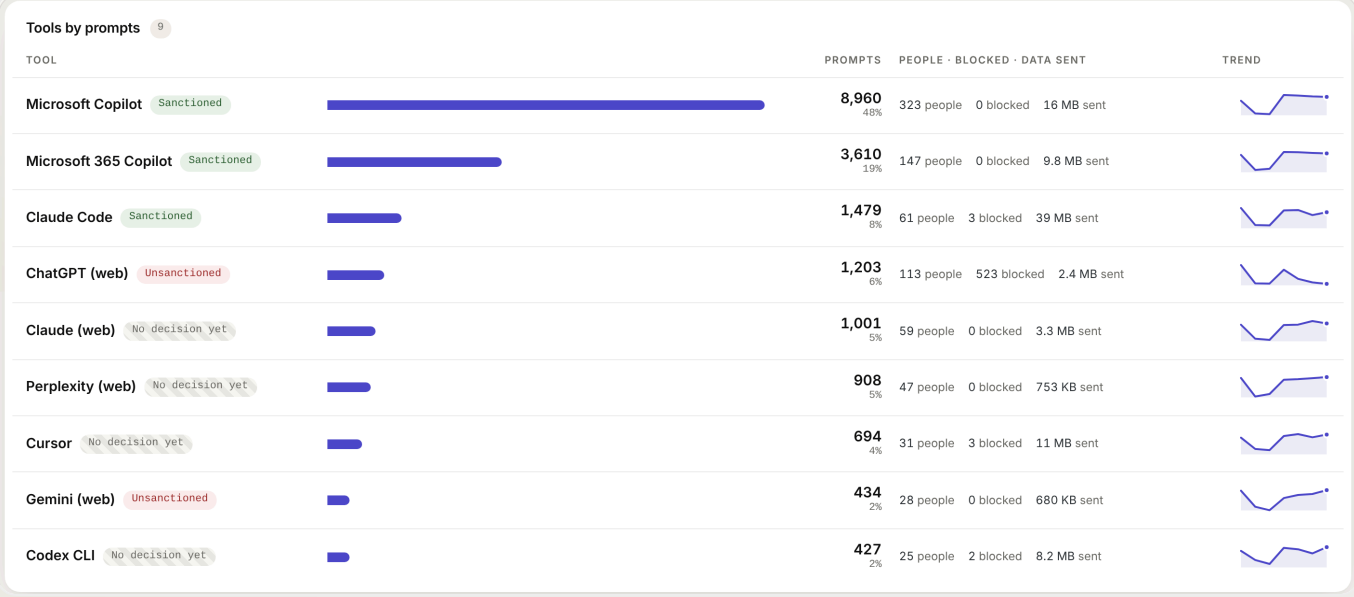

63%
had no AI policy, or were still writing one[1]

Know
Which AI tools people use, and how many use each.

Protect
Sensitive data detected on the device. Unapproved tools redirected.

Prove
A tamper-evident audit trail, and CSV exports for auditors.

Decide
Which tools to approve, and for how many seats.

The Usage page, with sample data.

[1] IBM, Cost of a Data Breach Report 2025.

What it covers

In Chrome and Edge

ChatGPT, Claude, Gemini, Perplexity
Warn, block or redirect

Microsoft Copilot, Microsoft 365 Copilot
Recorded

In coding agents, on Windows

Claude Code, Codex CLI, Cursor
Warn or block, including sensitive prompts

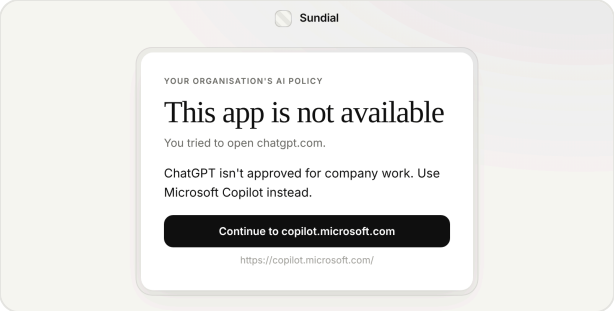

GitHub Copilot
Recorded

Enterprise plans BETA

ChatGPT Enterprise, Claude Enterprise, Microsoft 365 Copilot
Their admin records, for devices without the agent

Redirect, not just block

Your message, and one click to the tool you approve.

Private by design

- Prompt text stays on the device by default.
- Only set roles can open a prompt, and every look is audited.
- No leaderboards of people in the console.
- A device that stops reporting says so.

Deploys with the tools you already run

Microsoft Intune

Installs the agent, which updates itself.

Browser policy

Force-installs the extension in Chrome and Edge.

Microsoft Entra ID

Work-account sign-in and directory sync.

Hosted for you

No servers for you to run.

Plans

per monthly active user, billed annually

Proposed, not final: names and prices will change.

Observe — SEE IT

$5

$6,000 a year minimum

- AI tool usage, people and devices
- Sensitive data findings
- Search and CSV export
- Captured prompts kept 30 days

Govern — STEER IT

$9

$10,800 a year minimum

- Everything in Observe
- Rules that warn and block
- Redirects to the tools you approve

Enterprise — PROVE IT

$14

$16,800 a year minimum

- Everything in Govern
- Connectors for enterprise AI plans (beta)
- Event records kept a year

Planned, not yet available: an EU data region and an uptime SLA.

See what AI your people use, on your own devices.
